### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Franklin Gubernick on 12/9/04.

The application has been amended as follows:

The abstract has been rewritten as follows:

#### --ABSTRACT

A sealing system adapted for placement into an exterior groove of a structure. The sealing system includes a seal ring having a generally 'L'-shaped cross-section. The sealing system further includes a canted-coil spring. The seal ring includes an inner surface, an outer surface and two side surfaces. The seal ring's inner surface features a groove that increases the ring's flexibility. The seal ring's outer surface protrudes outwardly until it is pushed inwardly through contact with an inner surface of an external structure. As the outer surface moves inwardly, it causes a compression of the spring while a part of the seal ring flexes and bends about the seal ring's groove. At the same time, the outer surface becomes reoriented in a manner that cause its shape to change to a flatter configuration that is more complementary to the inner surface of the internal structure.--

In claim 15 line 8, "interior" has been replaced with --inner--.

In claim 19 line 1, --portion-- has been inserted after "end".

In claim 23 line 1, --portion-- has been inserted after "end".

In claim 26 line 1, --portion-- has been inserted after "end".

Claims 28 and 29 have been canceled.
